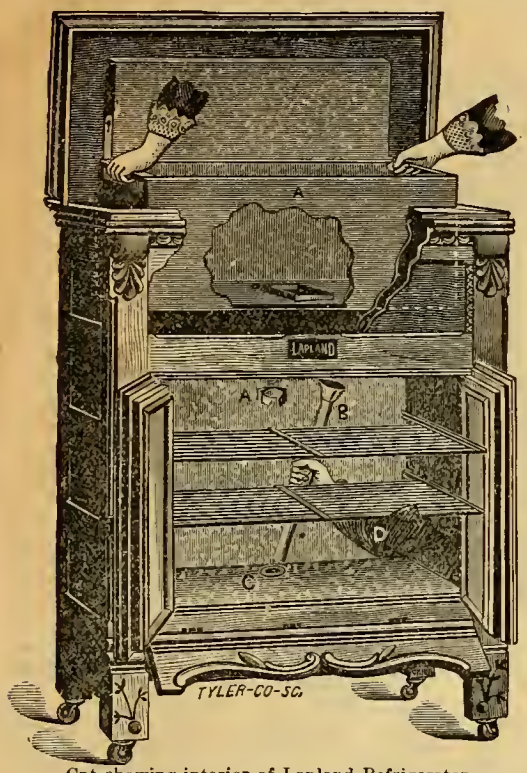
60 days net, 30 days less 1 per cent., 10 days less 2 per cent.

THE LAPLAND SOLID OAK REFRIGERATORS.



Cut showing interior of Lapland Refrigerator.

Antique Finish. Removable Ice Chambers. Mineral Wool Filling. Charcoal Sheathing. Lined with Galvanized Iron. Adjustable Sliding Shelves. Removable Waste Pipes and Partition. Extension Spring Door Hinges. Genuine Bronze Trimmings.

Why the Lapland is Far Superior to all Others:

It is not the ordinary so-called "hardwood" box, but kiln dried, **solid oak,** with hand carved ornaments, and is highly polished.

The space between the inner and outer case is filled with **mineral wool,** kept in position by means of horizontal strips and covered with **charcoal sheathing.**

The **mineral wool** is placed in small compartments so that it cannot settle to the bottom of the refrigerator, leaving the ice chamber unprotected.

Charcoal sheathing is used to keep it in place and to divide it from a **dead air space** between the outer wall and the charcoal sheathing.

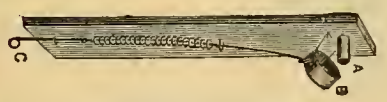
This combines the **three most satisfactory insulators** that have ever been discovered. Any one of them might answer in most cases, but using all three makes a certainty of it.

The **ice chamber, waste pipe and shelves are removable,** and when taken out, leave the entire inner part of the box free for cleaning.

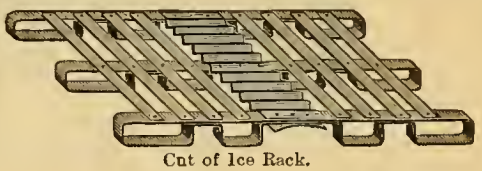
It is fitted with a **perfect spring trap drip cup** of ample size, and can be opened from the front.

It is equipped with extension spring hinges, which close the doors automatically.

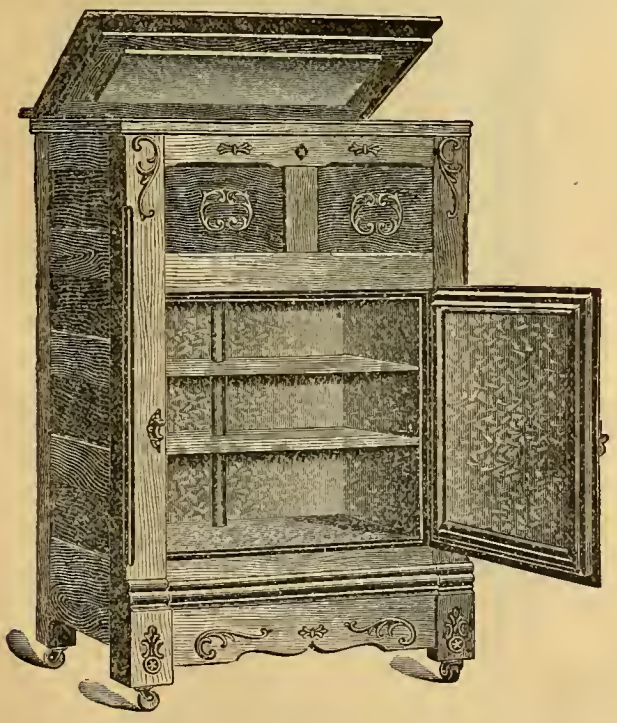
All are furnished with locks and keys.



Cut of Drip Cup.



Cut of Ice Rack.



Cut Nos. H5 and H6 Lapland. Nos. H33 and H34, same style with Cooler.

SINGLE DOOR, OPEN TOP ICE CHAMBER.

No.	Width, inches.	Depth, inches.	Height, inches.	Holds of Ice about	Each.	With Porcelain Lined Water Cooler. Each.

FORCE PUMPS.

For Washing Windows, Spraying Trees, Etc.

No. H45.
Cut of Pump.

This is a splendid, durable Pump, and will last many years, as there is nothing to get out of order. It has brass tubing and nozzles, and the caps are made of smooth metal, insuring perfect action. Three feet of heavy rubber hose go with each Pump. It has one three stream nozzle and one spray nozzle, and if a solid stream is desired, the hose end of nozzle gives the best result. It weighs 5 pounds.

No. H45 ..... each, $2 65

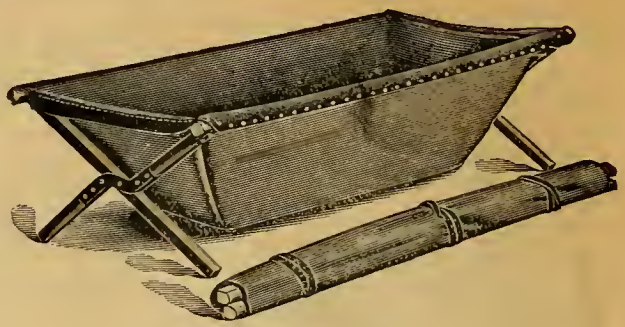
60 days net, 30 days less 1 per cent., 10 days less 2 per cent.

FOLDING RUBBER CLOTH BATH TUB.

The frame is of hardwood, rock elm, nicely finished with filler and varnished, fitted with patent metal joints by means of which it folds easily and compactly. The frame thus constructed stands firmly on the floor and is kept in the same position no matter how much weight the tub contains.

The cover of this tub consists of very heavy closely woven duck, which is coated with thoroughly refined, vulcanized rubber, cured and thus rendered tough and pliable. We guarantee it not to crack. It is composed of a single piece in which there are no cuts or seams. As the duck is thoroughly coated with pure rubber, it has a perfectly smooth surface and is as easily cleaned as a porcelain tub. It is uninjured by soap, salt, sulphur or medicated waters. It is not necessary to dip the water out to empty the tub, simply take hold of the rails and lift up one end, when the other end forms a trough and the water can be easily poured into a pail without spilling a drop.

It is not suspended, but rests on the floor about one foot in width the entire length of the tub. At the top it is about 5 feet long by 27 inches wide and is 16 inches deep; these are about the dimensions of the modern metallic tub.

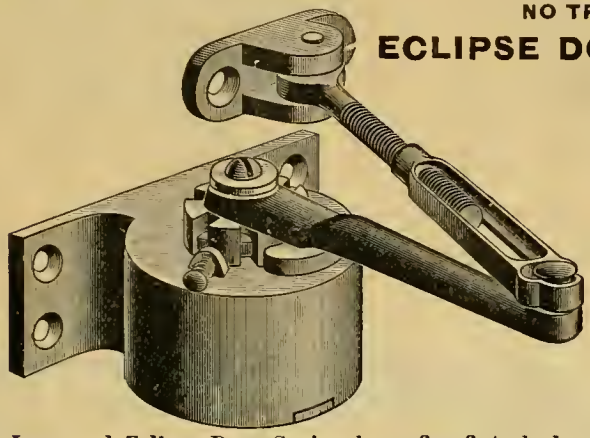


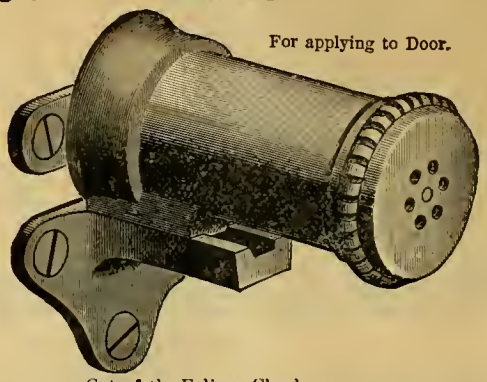
Cut Nos. H20 and H21.

No. H20. Adult's Tub.....each, **$7 50** **No. H21.** Infant's Tub.....each, **$3 75**

NO TRADE DISCOUNT.

ECLIPSE DOOR SPRINGS AND CHECKS.





For applying to Door.

Cut of the Eclipse Check.

The Improved Eclipse Door Spring has a fine flat clock spring instead of a coiled wire, and is suitable for either right or left hand doors.

The spring is adjustable tension, very compact and powerful.

The power is greatest when the door is closed.

No. H20. Cut of the Improved Columbia Washer.

COLUMBIA WASHING MACHINE.

THE IMPROVED COLUMBIA WASHER.

A washer that will stand every test, and so constructed that a child can operate it. The improved pin-head, which is made of malleable iron, and the post, which is turned out of wrought iron and firmly secured together, and all heavily galvanized, will last a lifetime; while with other machines of similar make they are made of wood and are the first parts to give way. The post on the Columbia Washer does not protrude underneath pin-head to entangle the clothes, and cause rents in worn places. A few pieces can be washed at a time, when desired, as well as a tubful, as the weight of metal pin-head and post adjusts itself to amount of clothes in machine, having a **coil spring** on upper part of post to give pressure according to the amount of clothes, while with other machines the wooden head floats on top of the water, so that a few pieces cannot be washed successfully.

A small anti-friction wheel is used to hold cogs in mesh, which saves much strength in operating, as it does away with all friction.

Castings throughout are very strong and any part will be replaced, free of cost, if broken in ordinary use.

No. H20. Each.....**$2 60**
½ dozen lots.....each, **2 25**
